Offer flexible materials

Ben Britton describes how digital technologies can be used to build options and supports into the learning environment.

Benefits of digital text

Digital text is valuable
because it can be:

- ✓ adjusted so that the style, size, and colour of fonts are the best fit for the student
- ✓ converted to speech using text-to-speech tools
- ✓ hyperlinked to definitions and background information
- ✓ illustrated with moving images and images from own context
- ✓ highlighted, annotated, and underlined to guide the reader's attention
- ✓ easily linked to and from other online environments and documents
- ✓ accessed and collaboratively edited 24/7.

Suggestions for using text-to-speech

Encourage the use of text-to-speech across the curriculum.

- ✓ Listen and read along with unfamiliar texts to develop reading fluency.
- ✓ Access texts beyond the students' reading level.
- ✓ Listen to audio while doing another activity, such as exercise, travelling, or resting the eyes.
- ✓ When editing writing, select sections of text and listen back for errors and fluency.

Reflection questions

Consider the following questions in your own context.

How do I provide varied accessible media to present concepts and content?

In what ways do I invite student feedback on the usefulness and accessibility of materials?

Do I offer graphic organisers, rubrics, checklists, templates with varying amounts of content to help students to organise and document thinking?

Do I prepare materials and media designed with varied levels of challenge and make them available to all students?

Are the materials I offer relevant to students' lives?
