

# Match teaching methods to student preferences

A suggestion for implementing the strategy

'Design considerations in secondary settings'

from the Guide: [Universal Design for Learning](#)

---

## **Includes:**

- Design for engagement
- Ask students what can help
- Offer online options
- Teach for diversity
- Reflection questions
- Useful resources

## Reflection questions

Reflect on the following statements, then ask students to share their perspectives.

How do I create opportunities for students to connect learning to their culture, interests and things that matter to them?

How do I activate background knowledge and drawn attention to critical features in varied and flexible ways?

How do I ensure students have the supports, options, and challenges they need to demonstrate their understanding in ways that work for them?

How can I increase opportunities for students to use their first languages in learning?

In what ways could I provide students access to learning if they are absent from class?

How do I offer multiple opportunities for students to learn from and with others?
