## Increase relevance and value

Students are more likely to engage when they have the ability to make choices about:

- ✓ tools and resources they might use (digital and non-digital)
- ✓ methods to share their ideas and understanding
- ✓ subject content
- ✓ how they physically and virtually access an environment
- ✓ order of learning tasks
- ✓ when to sit assessments
- ✓ who they might access for help
- ✓ the process to finish or complete a task
- ✓ who they might work and collaborate with.

## Reflection questions

How can I/we:

Provide options and flexible pathways within tasks or a lesson?

Involve all students in creating choices?

Offer options that align with learning preferences and needs?

Provide classroom activities and materials that students are able to personalise?

Provide culturally relevant classroom activities, materials, and contexts?

Offer multiple strategies to support problem solving?

Introduce ideas and concepts in ways that capture students imagination?

Create a safe and distraction free environment?

Build flexibility into lessons to allow breaks?

Collect ongoing student feedback in different ways to inform the design of lessons, resources, and materials?
