

Manage medication

Some students with ADHD take medication.

Work with family and whānau to create a medication plan that sets out when and how much medication is given.

- ✓ Read your student's plan and keep it handy.
- ✓ Know your role in helping your student to take their medication. Know, for example, whether you need to prompt them to take it and how you will do that. You may need to arrange safe storage for the medication.
- ✓ Learn to recognise when the medication has worn off or if it is causing side effects.
- ✓ Provide a private place for your student to take their medication.
- ✓ Do not disclose medication use to other students without permission.
