Obtain medical information

The image displays two enrolment forms side-by-side. The form on the left is the 'RONGOTAI COLLEGE ENROLMENT FORM'. It includes sections for 'COMPLETE THIS SECTION ONLY IF STUDENT IS LIVING WITH A CAREGIVER' and 'FOR STUDENTS WHO WERE NOT ACHIEVABLE'. A magnifying glass is positioned over the 'FOR STUDENTS WHO WERE NOT ACHIEVABLE' section, with a callout bubble that reads: 'prescription medicines or an Epi-Pen requirement'. The form on the right is the 'Enrolment Agreement Form' from Northshore Playcentre. It includes a 'Medicine' section with 'Category (i) Medicines' and 'Category (ii) Medicines'. A magnifying glass is positioned over the 'Category (ii) Medicines' section, with a callout bubble that reads: 'if your child requires medication as part of an individual health plan, for example an ongoing condition such as asthma or eczema'.

Identify learners with allergies

Supplementary questions added to a standard medical form can result in effective identification and support for learners with allergies.

- ✓ Does your child or young person have an ASCIA anaphylaxis or allergic reaction action plan?
- ✓ Has your child previously had anaphylaxis?
- ✓ Does your child have an EpiPen?
- ✓ Has your child been prescribed any medication for allergies by their doctor? Explain the dosage and how to administer it.
- ✓ Have you provided written consent to administer medication as required?
- ✓ What causes your child to have an allergic reaction (for example, eating specific foods, skin contact with allergens, inhaling allergens)?
- ✓ How does your child react to specific triggers, (for example, with a rash, wheezing, coughing, or sneezing)?

Ease anxiety

Parents may be worried about the safety of their child, especially if they are at risk of anaphylaxis.

Provide support during the enrolment process.

- ✓ Follow-up on a child or young person's enrolment information.
- ✓ Organise a meeting with parents to discuss their and their child's individual needs.
- ✓ Discuss risk minimisation strategies and develop a health-care plan. When the young person at risk is at high school, they will usually be included in this discussion.
- ✓ Explain health and safety policies and procedures for managing allergies.
