Get the right people around the table

Bring together a team to work in partnership with the autistic student and their whānau.

- ✓ Discuss with the student and their whānau who could be part of a supportive team, for example the learning support coordinator, RTLB, support worker, dean.
- ✓ Consider asking colleagues who have experience of autism and teaching autistic students if they would like to contribute.
- Consider connecting to external expertise or agencies with specialist knowledge in autism, for example Autism NZ, Altogether Autism.
- **✓** Build regular times for communication.

Make regular times to communicate

Communicate and share information and successes in a meaningful way, demonstrating understanding and support for parents' concerns.

- ✓ Encourage parents and caregivers to share what they have noticed or assessments they have had done outside school.
- ✓ Build on any programmes or materials used at home to maximise consistency and support for the student.
- Develop systems for passing on information about a student's needs, progress and next steps.
- ✓ Share information about out-of-school programmes that may help to boost the student's self-esteem, for example, classes or groups for music, art, dance or sports.

Take an inquiry approach

Develop a responsive evidenced-based process of working together that supports students' self advocacy.

- Support the akonga and whanau to lead and guide the conversation.
- Work collaboratively to identify key learning goals, responsibilities and what success would look like.
- Share concerns, questions, and ideas.
- Consider ākonga strengths as well as barriers to learning.
- Identify how solutions or strategies will be implemented, refined and reviewed.
- Discuss how to assess learning in ways that work for the student.
- Agree on how to stay in touch and share information.

Gather useful data

Gather qualitative and quantitative data to build a full picture of the student's strengths, needs and preferences.

Qualitative data examples:

- student and whānau voice, feedback, surveys and discussions
- ākonga, kaiako and peers share experiences and impacts
- reflections on learning and real time reporting techniques.

Quantitative data examples:

- language and communication skills assessments and observations
- social interaction observations
- learning behaviour observations.
