Support concentration and memory

Ideas for supporting concentration and short-term memory.

- ✓ Monitor and moderate the classroom for visual and auditory distractions.
- ✓ Present information in a range of ways over an extended period of time (for example, a week) to help students retain information, build up their understanding and familiarity of the topic, and stay stimulated and focused.
- ✓ Discuss the effectiveness of the classroom with students and remove barriers and make modifications where needed.
- ✓ In online environments make effective use of visual prompts and cues to support understanding and navigation. Make useful hyperlinks to background knowledge or previous learning to increase connections.
- ✓ Schedule regular short breaks to allow students to move around.

Support planning and organising

Suggestions for supporting students' planning and organising.

- ✓ Use charts, visual calendars, colour coded schedules, visible timers and cues to increase the predictability of regular activities and transitions.
- ✓ Encourage students to use their mobile devices to schedule alerts and reminders for regular and novel events and task deadlines.
- ✓ Highlight patterns, critical features, big ideas and relationships, using visuals, mind maps, 3-D manipulatives, outlines, flow charts, and real objects.
- ✓ Model and make available graphic organisers and flow charts to support planning and thinking in all curriculum areas.
- ✓ Break tasks and lengthy assignments into small manageable parts. Schedule workflow using [Trello](#) to organise what needs to be done and when.
- ✓ Provide options so that students can submit work online.

Offer visual timers

Visual timers, can help students "see" the time they have for a task.

This can reduce stress and increase motivation.
