Design online learning environments

Use these suggestions to design accessible and useful online environments, such as blogs, wikis, and moodle, for your students.

- ▲▲ Keep the design simple.
- ▲▲ Use a clear predictable structure to help students find what they need.
- ▲▲ Reduce visual and auditory clutter. (Students with ADHD and autism may also find this strategy useful.)
- ▲▲ Support navigation with both high contrast text and visual cues.
- ▲▲ Check with students that the way you are organising instructions and resources is working for them.
- ▲▲ Hyperlink to visual calendars and mind mapping options to support planning.
