Support concentration

Provide options to support concentration, thinking and short-term memory.

- ✓ Monitor and moderate the classroom for visual and auditory distractions.
- ✓ Make links to background in a range of ways over an extended period of time (for example, a week) to help students to retain information, build their understanding, and stay stimulated and focused.
- ✓ Discuss with students the effectiveness of the classroom and make modifications and remove barriers where needed.
- ✓ Make effective use of visual prompts and cues to support understanding and navigation in online environments.
- ✓ Make hyperlinks to background knowledge or previous learning to increase connections.
- ✓ Encourage students to adapt the environment to meet their needs by, for example, wearing headphones, moving to a quiet working environment or taking a walk to support their thinking.

Support organisation with visuals

Suggestions for supporting students' planning and organising.

- ✓ Use charts, visual calendars, colour-coded schedules, visible timers and cues to increase the predictability of regular activities and transitions.
- ✓ Encourage students to use their mobile devices to schedule alerts and reminders for regular and novel events and task deadlines.
- ✓ Highlight patterns, critical features, big ideas and relationships using visuals, mind maps, 3-D manipulatives, outlines, flow charts and real objects.
- ✓ Offer students a variety of graphic organisers and flow charts to support planning in all curriculum areas.
- ✓ Break tasks and lengthy assignments into small manageable parts. Schedule workflow using [Trello](#) to organise what needs to be done and when.
- ✓ Provide options so that students can submit work online.

Support time management

Source:

[Classroomscreen](#)

<https://classroomscreen.com/>

[View full image \(679 KB\)](#)

Introduce tools such as visual timers to reduce surprise that an activity is over or to signal that a transition is coming.

Give students extra time for processing

Suggestions for supporting students' processing.

- ✓ Provide extra time to complete work.
- ✓ Give regular breaks so students can move around during lessons.
- ✓ Give extra time if needed for students to move between classes.
- ✓ Give directions slowly in short sentences.
- ✓ Provide recorded lessons or books for students to listen to.

Scaffold and support student thinking

Use thinking routines to help students learn content across subjects and to visualise thinking.
