

Extend opportunities to build understanding

- ✓ Make provision for learning to take place at a slower pace.
- ✓ Provide multiple interactive opportunities for students to engage with new ideas and concepts.
- ✓ Offer opportunities to talk through mathematical processes and problems.
- ✓ Provide access to video and online examples of maths processes that allow students to revisit the steps involved as often as necessary.
- ✓ Support students to decode word problems by focussing on one aspect at a time. Use familiar names and scenarios so that there is less decoding.
- ✓ Provide visuals to support understanding.
- ✓ Offer extra time and access to adult or peer support when required.
- ✓ Provide extended time on tests and assignments. Be alert to the possibility of students freezing under the pressure of having to work quickly in timed tests.
