Definitions of UDL and differentiation

An approach and a strategy.

UDL is an overarching approach focused on the inclusive design of the whole learning environment at the outset. UDL aims to ensure all students have full access to everything in the classroom, regardless of their needs and abilities. Student's supported to self-direct learning and monitor progress.

Differentiation is a strategy aimed at addressing each student's individual levels of readiness, interest, and learning profiles. The teacher modifies content and processes to address the needs of each student. The teacher directs students to specific activities to further their learning.

Reflection questions

How does the idea of differentiation and UDL impact your practice?

Where do you make one off changes for learners that could be offered to everyone from the start?

Reflect on how your teaching approaches support students to independently identify next steps for themselves.
